

Gibbon

baby

8 months old

Gibbons have loooong arms.
Even baby gibbons have loooong arms
and loooooong fingers.
They use them to hang
and swing from trees.

Okayu

Female
Approximate age
8 months
Scientific name
Hylobates lar

Time for a Clap-Up

Can you see that this baby gibbon has

Five long fingers
on her hands?
Her nails are
shaped like
a human's!

Five toes
on her
feet?

Fluffy hair
all over
her body?

No hair on the
tips of her fingers
or the back of her
hands and feet?
Very little hair on
the face, too.

Small ears
underneath
her hair?
Can you find them?

Hint: you can see
only her right
ear here.
